PROFILE SUMMARY

Data Analyst fresher with a B.E. in Artificial Intelligence and Data Science (CGPA: 8.83/10). Skilled in SQL, Python, data visualization, and building real dashboards using Power BI and Tableau, with working knowledge of Machine Learning. Hands-on project experience in data validation, ETL, and statistical analysis, seeking a Data Analyst role to solve real-world business problems.

TECHNICAL SKILLS

Data Analysis and BI Tools: SQL, Power BI, Tableau, Excel, Data Analysis, Data Visualization, Business Intelligence, Data Warehousing, ETL, Data Modeling, SQL Optimization, Data Validation, Data Cleaning, Data Wrangling, Analysis, Data Interpretation, Reporting, KPI Tracking

Programming Languages: Python, SQL, HTML, CSS

Libraries: Pandas, NumPy, Scikit-learn

Databases: MySQL, PL/SQL

Additional Skills: Machine Learning, NLP, Generative AI, RAG, LLMs, Prompt Engineering

Tools and Platforms: VS Code, Jupyter Notebook, Google Collab, Postman, Git, GitHub, Docker, Kubernetes

Core Computer Science: Data Structures and Algorithms, Object Oriented Programming, DBMS, Computer Networks, SDLC, STLC

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Team Collaboration

PROJECTS

SQL-Based Test Data Validation and Reporting System

- Validated business rules across relational tables using SQL joins and aggregate functions, covering 300 plus records.
- Built and generated reports flagging data anomalies, streamlining manual review effort.
- Improved backend data quality and reporting accuracy through systematic, rule-based testing.

COVID-19 Public Health Data Trend Analysis (India)

- Analyzed state-level COVID-19 case data across India using SQL to aggregate and query trends across time periods.
- Built an interactive Tableau dashboard visualizing case trends over time to identify peak periods and patterns.
- Delivered state-wise trend insights to support data-driven public health reporting.

AI-Based Resume Screening and Job Recommendation System

- Built an NLP-based application in Python to parse resumes and recommend suitable job roles.
- Applied machine learning and similarity-matching techniques (SBERT, TF-IDF, cosine similarity) to automate candidate-job matching.
- Reduced manual resume screening effort by automating candidate-job matching.

EXPERIENCE

Rob Waves - Team Member

- Selected to represent RoboWaves at an international robotics event in the USA.
- Collaborated on technical preparation, data tracking, and team coordination activities.

Freelance Technical Services

- Delivered automation, web development, hosting, and data-related editing solutions for clients.

EDUCATION

B.E. in Artificial Intelligence and Data Science 2022 - June 2026

Anantrao Pawar College of Engineering and Research, Pune (Affiliated to SPPU), CGPA: 8.83/10

HSC - Science 2021 - 2022

New English High School and Junior College , Wardha MAH

LEADERSHIP AND ACHIEVEMENTS

- Hostel Student Leader for 4 consecutive years; active sports leader with 2 plus years of consistent gym training.
